† Susceptibility data includes meningitic and non-meningitic isolates. # Number of isolates too few for statistical analysis

**Note:** Susceptibility profiles are derived from all specimens received by the Clinical Microbiology Laboratory. Antibiotic susceptibilities of bacteria recovered from specific wards or populations may differ.

**Note:** \* Cefixime is not routinely tested in ampicillin-susceptible isolates of *S.Typhi* and *S.Paratyphi*. The percent susceptibilities may be considered the same as those observed for ceftriaxone.
