

Antibiogram of Lahore General Hospital

(01-01-2021)----- (30-06-2022)

- Antibiogram can help pick empiric antibiotic therapy.
- However, the antibiotic should be adjusted as soon as the original culture and sensitivity report becomes available.
- The percentage given in the tables is the percentage of organisms sensitive to the respective drug
- Colistin Sensitivity has not been entered into the antibiogram because of its 100% sensitivity.
- Organisms reported less than 30 times are not included in the antibiogram
